No. 23.

## SUMMER RESORT WILL OPEN FOR BUSINESS FRIDAY

Splendid Bathing and Swimming Accommodations, Meals and Luncheon Served; Sleeping Quarters

The Daddys Creek summer resort will be opened for business Friday by W. B. Bandy and M. C. Dunbar, who recently purchased the property. They have made extensive improvements in that they have arranged to have a regular restaurant open day and night and will also have sleeping accommodations for tourists or those who may wish.

They have cleared off about an acre for a parking place for cars so that the congestion that prevailed in that way is now fully relieved and pleasure seekers will be able to leave their cars in safety and with the assurance that they will be able to get out with ease when they wish.

W. B. Bandy has moved his family there and will be ready to serve the transient and traveling public promptly and in a pleasant way.

Aside from serving lunches and meals they will also carry plenty of soft drinks and ice cream so that the hot and thirsty pleasure seeker may have his wants supplied promptly.

Messrs Bandy and Dunbar will conduct their place in such a manner as to give no countenance to bad conduct in any way and will make a special effort to see that all comers are treated with courtesy and their wants promptly supplied.

## POMONA

Dr. C. F. Mooney, Mrs. H. K. Mooney and son, Harry, of Knoxville, and Mrs. Corda Copenhaver, of Virginia, are the guests of Mr. and Mrs. J. E. Converse.

Mrs. H. C. Phillips, of Denver, Colo., is spending the summer with her home folks here.

Henson Benedict returned home last week from a tour of the blind in Nashville.

Mr. and Mrs. Thomas Robert moved to their new home on the Memphis-to-Bristol highway west of Pomona last week.

There will be an ice cream social at the school house Friday evening, June 9th., the proceeds to be used on the minister's salary, and for other expenses of the M. E. Church, south. This is a worthy cause and it is hoped every one will respond generously to the movement.

Misses Myrtle and Effie Henard returned home recently after spending several months in Morristown.

W. C. Keyes was over from Crossville last week visiting Mrs. C. M. Ferris.

James and Edward Campbell and children moved to Clifty last week.

Mr. and Mrs. Robert Neal arrived recently from Jefferson City, and are making their home with Mr. Neal's parents.

June 5. O. B. D.

## STATE COMMITTEEMEN

Saturday was the last day for candidates for State Committeemen to qualify. The republicans of this district have four candidates in the field and the democrats only two.

Following are the list of republican applicants.

I. J. Human, Wartburg,  
Norman Massey, Cookeville,  
Sam Pickering, Carthage,  
J. Q. McDonald, Byrdstown.

The democrats have the following candidates:

J. N. Cok, Cookeville,  
J. Thos. Baskerville, Gallatin.

In the case of the democrats there will likely be no names for committeemen placed on the ballot as only two men have qualified and they will be formally declared elected.

In the case of the republicans all four of the names will have to go on the primary ballot and be voted for and the two receiving the greatest number of votes will be elected. Each congressional district is entitled to two electors. That means the respective State Committees will be composed of twenty committeemen.

The Art Circle will meet with Mrs. M. F. Reed, Friday afternoon.

J. M. Baird was over from Ozone on business yesterday. Mr. Baird is one of the most thrifty and successful farmers of the Ozone neighborhood and has developed a splendid farm.

Miss Selma McClarty, who was taken to Nashville some days ago for an operation for appendicitis, arrived home Friday and is now considered fully on the road to complete recovery.

## DEADLY EFFECTS OF THE BOOTLEGGER'S BOOZE

One Is Stricken Blind, Another Dies from Effects of Single Drink on Pullman.

A prominent writer in the Review of Reviews gives some very lurid pictures of the results of drinking the whiskey that is commonly sold by bootleggers in cities. Following is one instance he recites:

### Terrors of Synthetic Whiskey.

"One of the most difficult problems that the enforcement officials doubtless will always face is the requirement of alcohol in the arts and industries. As soon as the bootlegger discovered that they were not going to be allowed to withdraw enough liquor to take care of their trade, there began to be an enormous demand for grain alcohol. This, with fusel oil and coloring matter, was made into imitation whiskey. Immense quantities were put out under established brands, these labels as well as the revenue stamps being forged.

This synthetic whiskey was villainous stuff, much of it in large part wood alcohol; and distressing results were experienced as the sequels to its consumption. Commissioner Haynes told me an incident which he had fully authenticated. A man was undressing for bed in the dressing room of a Pullman, when a fellow passenger asked if he would like a drink before retiring, saying that he had something whose origin was absolutely reliable. They took the drink, and both retired. Some hours later the man who had accepted the hospitality awoke, feeling peculiarly wretched. He tried to switch on the light in his berth, but was unable to do so, and called the porter directing him to do it.

"Why, Boss," replied the porter in amazement, "de light's on now!"

"My God! I'm blind," exclaimed the passenger. And it was a fact.

"Whah did you git dat licker, Boss?" asked the porter.

"From the gentleman in No. 9."

On the light, and found the passenger dead.

"You can take it from me," declared Commissioner Haynes, after he had narrated this tragic story, "that just about 98 percent of the liquor now being sold by bootleggers is of that sort. Not all of it so deadly; some of it might be consumed in moderation for weeks or even months before bringing disaster. But all of it, up to the 98 percent, will within a comparatively short time destroy the inside works of whoever consumes it; the liver, the kidneys, and the eyes are particularly susceptible."

I wanted to know how the Commissioner arrived at the figure of 98 percent.

"I put it at 98 percent advisedly," he replied. "I know what I am talking about. We are familiar with all the stuff that is being put out. We get samples and analyze them; and when I tell you 98 percent is absolutely dangerous to the life of the drinker I am telling you what I know. What is more, the drinkers are making the same discovery, and are quitting. Just the other day a gentleman of my acquaintance bought a supply of liquor from a bootlegger, to serve at a dinner party in his home. A round of cocktails was served before the dinner, and some of the guests took another drink later; most of them declined. The dinner was not a very cheerful or animated function and the company dispersed early. Very soon after, both the host and his wife were taken violently ill and a doctor was summoned. He demanded to see the liquor they had served at dinner, and after caring for them carried away a bottle of it. Next morning the host learned that everybody who had taken a drink had been ill during the night though none of them had died. The physician had the liquor analyzed and reported to the host that it was a deadly wood alcohol concoction that would certainly have produced some tragedies if the company had taken another round of drinks."

## FORTUNE IN PEACHES.

The daily press reports that the Peach Growers Association of Roane county has contracted its peaches this year at \$3.00 a crate. Not all peach growers of that section belong to the association. Last year it is claimed the peach crop brought more than \$100,000 to Roane county.

If some enterprising genius would put out a peach orchard on Crab Orchard mountain or on the face of Waldens Ridgefronting north there is every probability that he would soon develop a wonderful business.

## GOVERNMENT ISSUES BRICK ROAD FILM

Showing How the Brick Are Made and Laid in the Most Durable Road.

With its latest motion picture release—a brick road film—the Department of Agriculture, through the Bureau of Public Roads, has made available to the public, motion pictures on three types of modern paving: asphalt, brick and concrete. Due to this activity of the government the general public, through farmers granges, city civic associations and the like, can obtain, graphically, information on modern highway construction.

The brick picture starts with the mining of the shale or clay, and gives a clear idea of the heavy labor and fuel expense in connection with the manufacture of this paving material.

The shale first is finely ground under rollers weighing several tons, and is then mixed with water in a "pug" mill that looks like a bread dough mixer. When it reaches the desired mud-like consistency, it is forced thru a die under tremendous pressure and escapes from the opening much like tooth paste; escapes from its container, except that it is perfectly moulded and compact into a solid mass.

After being automatically cut to the desired width, the brick, traveling along on a moving belt, is lifted by hand and stacked on cars for storage in the dryer, where the water used in mixing is evaporated.

When almost dry they are stacked in kilns where, with a heavy consumption of coal, they are heated to the melting point, a process which takes more than a week. This brings about vitrification, or the fusing of the shale particles. The brick are then allowed to cool slowly, which results in annealing or toughening. When they are ready to be taken from the kiln they are perhaps 75 percent as hard as diamonds, and so tough and dense as to withstand the heaviest traffic without wearing away.

The brick are then sorted into three classes: first, second and third. They first are sorted as they leave the kiln, all broken, cracked or chipped brick being thrown aside. They are sorted a second time when piled in the cars for shipment. Then a third time, after they have been laid in the pavement and before the filler is applied, an inspector goes over them thoroughly and any that will not pass visual inspection are thrown out.

The picture shows the "rattler," a machine in which brick are tested officially. The rattler is like an iron barrel in which the brick are placed with large and small iron shot, the large shot being bigger than a baseball. The barrel is then revolved at a set speed a certain number of times and if the brick, when removed, have lost more than a certain percentage of their original weight, they are refused.

After portraying the details of manufacture and inspection, the film shows the unusual diversity in the use of brick for surfacing city streets and country highways. (Brick streets in use today range from the more simple designs, where brick are laid on the natural soil without artificial base, up through the more elaborate design to a point where thick bases are specified because of exceedingly heavy traffic.)

The picture shows in detail several modern methods of laying brick surfaces on various types of bases and with different kinds of fillers between the joints, and closes with the sub-title: "Vitrified Brick makes a high-class durable pavement, suitable for the heaviest traffic, expensive in first cost, but cheaply maintained."

## POTATO BUG RIDDANCE.

In Tennessee Agriculture, the little monthly bulletin issued by the State Agricultural department, we find the following remedy for potato bugs. "Potato raisers who are troubled with potato bugs, will find that they can get rid of them promptly by gathering cedar and stripping it from the limbs, boiling the foliage in water, and with the liquid thus secured, spray their potatoes; they will find that the potato bug will make its departure very promptly. Also the striped bug that is troublesome with cantaloupes and melons. Where cedar is available the potato bug can be put out of business. The preparation is not poisonous."

Prof. J. L. Rose, principal of the high school, plans to leave Friday for Knoxville to enter the Summer school. He is likely to be absent the greater part of the summer.

## DEMOCRATS CONVENE AND ENDORSE E. G. TOLLETT

T. E. Wilson Chosen As Chairman and J. V. Wright As Secretary for Next Two Years.

The democrats met in mass convention in the circuit court room at the court house Monday at one o'clock and the meeting was called to order by G. W. Davenport. On motion and second former Senator T. E. Wilson was chosen chairman and J. V. Wright secretary for the next two years.

The usual committees were appointed and retired to perfect their reports, during which time the convention was addressed by F. B. McElwee in a characteristic democratic speech. On this occasion, however, he handled the republicans more gently than is the usual custom. At the close of the speech, R. F. Rose, of Crab Orchard, a well known republican, arose and made the motion that the speech of Mr. McElwee be made a part of the proceedings of the convention and a copy be sent to Senator Tom Watson of Georgia. Chairman Wilson treated the motion with an amusing remark and the incident passed with a smile and good natured laugh by many in all parts of the house.

About 100 persons were in the house and of the number more than four-fifths were democrats. They cheered Mr. McElwee on numerous occasions and seemed to be fully in harmony with his utterances.

The resolutions indorsed former Senator E. G. Tollett for State senator from this ninth district. He made a brief talk in which he stated that he would be pleased to defeat his former opponent Hon. G. W. Poague and said he believed he would be able to do so.

The resolutions also endorsed the course of Hon. Cordell Hull during his service as congressman from this district and pledged him the loyal support of the party in this county in the fall election.

The resolutions commended the course of Woodrow Wilson and spoke of him as the "people's great leader."

Favored the leasing of Muscle Shoals to Henry Ford and condemned the slow movements of congress looking to that end.

All known democrats, men and women, in the county were declared to be accredited delegates to attend any and all conventions when and where called.

Following are the

### RESOLUTIONS:

Crossville, Tenn., June 5, 1922.  
We, your committee on resolutions, beg to report the following. That we reaffirm our allegiance to the time honored principals of the Democratic party as advocated by Thomas Jefferson and so ably exemplified by the peoples great leader Woodrow Wilson.

We are unalterably opposed to the present back-tax system and recommend its speedy repeal. We favor abolishing all useless offices and urge the strictest economy of the people's money. We urge the reduction of taxes in National, State and county affairs. We favor a real business administration in all the affairs of the government to the end that the peoples' burdens of taxation may be lightened.

We endorse the course of our fellow citizen, Ex-State Senator Hon. E. G. Tollett, who formerly represented us in the State Senate and we recognize in him a man who is eminently well qualified to assume the duties of this important office. He is a friend of the people, knows the needs of our immediate section, is a friend of good roads, a friend to the cause of education, and is in sympathy with the idea of an economical government efficiently administered.

We call upon him to become a candidate for the Democratic nomination for State Senator, from this 9th, Senatorial District, and pledge him our hearty and undivided support.

We unqualifiedly commend the selection of Hon. Cordell Hull by the National Democracy as our great leader. We commend his every act as congressman from our District and again pledge to him our united support in his candidacy for the nomination from this District, and urge his selection and pledge to him our united support both at the August primary and in the regular election in November next.

We condemn the policy of isolation from world affairs as administered by the present Harding administration and believe that it has brought about our present financial difficulties; resulting in the loss to us of our National prestige in world affairs, and produced at home among our people an unparalleled and uncalled for pan-

## CROSSVILLE PEOPLE IN BUSINESS IN FLORIDA

D. F. Southard and Sons and J. B. Johnson Establish the Belvedere Lumber Company.

It has been known in a general way for the big end of a year that the Southard Lumber Company and Jos. B. Johnson had opened a retail lumber yard at West Palm Beach, Fla.

D. F. Southard is president, J. B. Johnson Vice President, J. B. Southard Treasurer and D. L. Southard Secretary. D. F. Southard and son, J. B. Southard, were in Florida last winter assisting with the management of the business, but returned a few weeks ago to pass the summer here looking after business of the Southard Lumber Company. Their plans are now to return to Florida late this fall and practically close their business here for the winter, as they did last year.

The company is capitalized at \$75,000 and the business thus far has surpassed their most sanguine expectations and they are very much gratified with the outlook for the coming year, as the business revival which is generally admitted to be close at hand presents an encouraging phase to building in West Palm Beach that is sure to prove a tremendous business stimulator for them.

Since the Southard Lumber Company has numerous mills in this state and Alabama, their retail business in Florida is assisted and strengthened with the assurance of a never-failing supply of certain grades of lumber and at the same time the Florida business furnishes an outlet for a considerable portion of the output of the Southard Lumber Company, which makes a happy combination for both companies.

However, the Belvedere Lumber Company does not confine itself entirely to selling lumber as it handles all manner of building supplies, thus placing it in the forefront of the lumber concerns of that rapidly growing city.

Cumberland Davis was up from Clifty attending court this week.

Yesterday Elmore & West received a carload of Baby Overland cars, which they hope to sell to those wishing to purchase for business of pleasure.

At the regular meeting of Crossville Masonic Lodge, Monday night, work was done in the second degree, two candidates being received. The lodge was "called off" until Tuesday night for further work, at which time three more candidates were conducted thru the mysteries of the second degree. Crossville Lodge has been making very substantial growth for some months.

It is rumored in the Watson neighborhood that M. L. Patton is seeking a wife as he has set 60 duck eggs and his friends claim that no person of his habits and temperament would think of trying to raise that many ducks without having a woman to keep them from wandering into Daddys Creek and getting drowned. His friends will wait with interest further developments.

T. A. Kendrick, children and his mother plan to leave next week for Buhl, Idaho, to make their future home.

The Ladies Aid society of the Congregational church will meet Thursday afternoon with Mrs. P. V. Beadle.

ic; falling with special stress upon the laboring man, resulting in many commercial failures and almost completely paralyzing our business interests.

We feel that the interests of all the people require the restoration to power of the Great Democratic party, both in the state and nation to the end that peace and prosperity may be restored to the American people. We favor less politics and more business in both State and national affairs. And we condemn the dilatory tactics of the present Congress in refusing to lease to Henry Ford Muscle Shoals, thereby bottling up this great asset of the people and especially of the farming interests who are forced to continue patronizing the fertilizer trust at the expense of the laboring man.

Respectfully submitted,  
J. R. MITCHELL,  
V. L. LEWIS,  
J. L. SNODGRASS,  
G. W. DAVENPORT,  
J. D. McCLARNEY,  
WM. WOODY,  
JOHN A. FREY,  
Committee.
